Inks for industrial printing markets

BLACK INKS FOR HP TIJ 2.5

IQ2392 Black Inkjet Print Cartridge

The IQ2392 inkjet cartridge uses an innovative solvent based pigment ink formulation that successfully prints on glossy substrates such as aqueous acrylic overcoated media at high resolution.

The IQ2392 ink formulation is different from many other solvent based inkjet inks in that it contains a mild solvent.

The IQ2392 inkjet cartridge meets the industrial printing market requirement of high quality printing on aqueous coated glossy paper. Once dry, the print is exceptionally water resistant. The collaboration of GENERAL's ink technology and HP TIJ technology expands the scope of industrial printing for HP TIJ-based systems.

This ink is also available as bulk ink systems. Ask for IQ7467 & IQ7468 for print head kit and 350 ml bulk container.

IQ648 Black Sapphire Print Cartridge

Finally a quality 'Heatless Ink' for industrial package printing with HP Thermal Inkjet Technology.

With this ink you are ready to streamline your package coding and marking print jobs with elegance and affordability.

The IQ648 Black Sapphire ink prints on a variety of different substrates:

- POLYPROPYLENES
- ORIENTED NYLON
- UV COATS
- VARNISHES
- AQUEOUS COATINGS
- CLAY COATS

You will embrace the HP industrial package printing solution with General's 'Heatless Ink', as no heater or air dryer is required.

BLACK INKS FOR HP TIJ 2.5

Inks for industrial printing markets

IQ2392 Black Inkjet Print Cartridge

Specifications:

Cartridge Type	HP 45A
Color	Black
Ink Type	Solvent
Firing Voltage	10.0 V
Shelf life	Up to 1 year
Drying	No ink transference. Once dry the ink is exceptionally water resistant.

IQ648 Black Sapphire Print Cartridge

Specifications:

Cartridge Type	HP 45A
Color	Black
Ink Type	Solvent
Firing Voltage	7.0 - 8.0 - 9.0 V
Shelf life	Up to 1 year
Heater Requirement	No heater required, or air dryer only.

About General Technology:

The General Group of Companies, first established in 1914 for the manufacture of carbon paper in Japan, has grown into the global organization that it is today by keeping ahead of the pace of change. Innovation, quality, technical excellence, and great customer service are the four cornerstones of General's business.

General is headquartered in Osaka and Tokyo, Japan, with manufacturing facilities in Shiga, which is just outside of Kyoto, Japan. General has offices in North America, the United Kingdom and China.
