BLACK INKS FOR HP TIJ 2.5

Inks for industrial printing markets

C8842A Versatile Black Print Cartridge

The C8842A Versatile Black print cartridge contains a pigment-based ink that produces exceptional results on coated media. The Versatile Black print cartridge is a reliable, 100% tested product for printing on both porous and non-porous coated media.

Versatile Black dries in less than one second on porous paper without heating. When printing on glossy paper, use of a standard IR dryer will reduce uniform drying time of Versatile Black ink to less than a second. It will not smear on either coated or uncoated media.

Excellent print quality over a wide range of plain and glossy paper, on Tyvek, and on some types of varnish. Light-fast and water-fast.

C6195A Fast Dry Black Print Cartridge

The Fast Dry Black disposable print cartridge contains water/resistant, pigment-based ink that produces exceptional results at high speeds on porous media. This innovation in HP inkjet technology has been specially designed and manufactured for use in industrial printing markets.

Fast Dry Black ink dries in less than one second on porous media. The print cartridge is designed to print 600 dots per inch for use in applications where high-quality output is required.

Q2344A 1918 Dye-based Black Print Cartridge

HP designed the Dye-based Black print cartridge specifically to support intermittent industrial printing on a wide variety of substrates: Coated and uncoated papers, labels, and specialty media.

This dye-based ink optimally penetrates the surface of the substrate, producing sharp, crisp output without smearing or transfer - ideal for the packaging industry and other

markets that need consistently robust results. On coated substrates, such as photo papers, this dye-based ink enhances the glossiness of the medium.

Higher decap times reduce nozzle dropouts in production environments with intermittent printing requirements. Water-based.

Excellent print quality. 1918 Dye-based Black ink produces sharp, crisp, durable output without smearing or transfer.

45A 10-pack Features & benefits

The HP 45A 10-pack offers proven Original HP 45A industrial inks that delivers crisp black text on porous media.

There are 10 cartridges in easy-to-open, cost-effective packaging that makes inventory management a snap.

Proven, high-quality ink, same as the HP 51645A black print cartridge

- Water- and smudge-resistant - and ideal for porous media
- Good balance of optical density and decap time
- Excellent readability on bar codes and package coding

Easy-to-open and cost-effective bulk packaging

- Faster ink replacement times
- Fewer items to store and track

One-stop shopping - a single purchase order for 10 cartridges

HP Inks

COLOR INKS FOR HP TIJ 2.5

Inks for industrial printing markets

C6168A - C6169A - C6170A - C6171A

HP designed the Red, Green, Blue and Yellow Spot Color print cartridges for industrial printing applications that require spot colors to enhance their operations.

HP's Spot Color ink and thermal inkjet technology make color printing quick, easy, and as affordable as monochrome printing because it relies on easily replaceable ink cartridges rather than ink drums and plates.

HP Spot Color print cartridges can be snapped in and out for easy replacement.

Color Performance

These cartridges produce the equivalent of the following PMS color values when printed at 600 x 300 dpi on plain white multipurpose paper and viewed under office light conditions:

- C6168A (red) Red 179 U
- C6169A (green) Green 355 U
- C6170A (blue) Blue 3005 U
- C6171A (yellow) Yellow Pantone yellow U

These PMS values are for reference only. Results may vary depending on paper hue and light source.
