

HSA-WIPES

LINT FREE TECHNICAL WIPES

The print head or print cartridge is a vital part for the perfect print. Working with print systems requires a lint free technical wipe, in order not to damage the system.

Using the correct wipe, will save you money in the long run, as wipes are cheaper than replacing print heads.

Our **HSA-Wipe** is made from a white, non-woven material specially designed to use when handling delicate components like print heads, printing cartridges, sensors etc.

The folded size of each wipe is: 15.0 x 18.25 cm quarter folded.

Upon request other sizes and rolls can be delivered.

Please note that this requires certain amounts pr. Order. Please ask.

The wipes are packed in bags of 50 and a box contains 10 bags. These HSA-Wipes are stock-goods and part of our standard supply for the ink-jet printing industry.

Feel free to ask for a 5 pcs sample pack.
